

On Thursday, March 1, 2018 the Special Education Program Area held its annual Special Education Advisory Committee (SPEAC) Meeting. Special educators and administrators from all over the state of Alabama attended. SPEAC members were able to spend some time in the Virtual Avatar Laboratory (VAL) working with parents and middle school children. Pike Road Superintendent, Dr. Chuck Ledbetter successfully worked through a parent teacher conference. The Committee brainstormed different ways to integrate the VAL into the Special Education Program area.
